

GAME INFO

Game Name: Quartz SiO2

GameID: quartz

Release Date: 1st July 2021

Quartz SiO2 is a medium/high volatility, feature-rich 5X3 videoslot with Expanding Wild feature, offering a maximum potential win of around 900x.

Something is glooming inside these black stones – fortune awaits the one who dares to crack them open. Follow Lady Luck to the dark outskirts of Space, where the eminent sound design by Andrew Vasilyev sets the mood for this dark epic space adventure. Quartz SiO2 is a unique Game experience setting new standards for where a video slot can take you

WILD symbol substitutes for other symbols to complete the winning combinations! When Wild lands anywhere on the reel, it expands to cover the full reel and trigger the **RESPIN!** **WILD** appears only on reels 2, 3 and 4.

Any number of **EXPANDING WILDS** appearing on the reels trigger the **RESPIN** - you get additional spin for free, while the reels covered with **EXPANDING WILDS** stay intact! If one or two additional **EXPANDING WILDS** appear after the **RESPIN**, one more respin is triggered.

After a spin and any triggered respins are completed, you have the opportunity to risk it all and **GAMBLE** to increase your wins! Choose between betting on red or black to **DOUBLE YOUR WIN**, or go for the card suit bet to increase your win four times! **GAMBLE** is only available if your current win is less or equal 100 times the total bet your placed to spin the reels before the gamble. You may gamble **UP TO 4** times per round.

MATH

Layout: 5x3

Lines/Ways: 10 lines
