

GAME INFO

Game Name: Wilds Of Wall Street II

GameID: WildsOfWallStreet296

Release Date: 29th September 2020

Description:

Wilds Of Wall Street II is a medium/high volatility, feature-rich 5X5 vide slot with a ways pays mechanic and a maximum win of around 8,000x.

The game opens up to reveal the exterior of the American Stock Exchange with the reels in their initial 1x3x5x3x1 (45 ways) configuration. The player's goal is to obtain 6 wins in a row to trigger free spins where they can become the Wild Wolf, spinning on the market with the goal of making their fortune.

With any base game win, the player gets a **free re-spin** and the reels start to open up to create more possible ways. The re-spin sequence keeps going until the reels have expanded to their maximum 5x5 configuration (3,125 ways) or until the player loses. If another win occurs then the player is transported to their penthouse suite and to the exciting free spins feature.

Along the way to triggering free spins, the **Wild Collection meter** shows how many wilds have appeared on the reels. For every wild collected the player receives two guaranteed initial free spins. The player uses up these initial guaranteed free spins, after which the closing bells are revealed. Free spins are then 'endless' – coming to an end only after all three closing bells have been rung.

The free spins feature is played with the full 5x5 reel set. Before each spin, the **Market Meter** determines if it is going to be a **Bear or Bull market**. If it is a Bull market, between 1 and 4 extra wilds are randomly distributed onto the reels to increase the potential for creating wins. These wilds will remain on the reels for the rest of the free spins feature.

Where jurisdictions allow, players can buy into the Free Spins feature with the **Buy Into Bonus** feature.
