Popeye Help

Game Description

General Information

- Popeye is a video slot that has 5 reels, 3 rows, and 20 bet lines.
- The theoretical RTP for this game is XX.X%.

Symbols

- There are 20 symbols in the game, comprising 4 high-paying symbols, 4 low-paying symbols, a Wild symbol, a Free spin symbol, 3 multiplier increase symbols, and a coin symbol.
- Wild symbol substitutes any paying symbol in a winning combination. Wild doesn't substitute Free spin-, multiplier increase- or Coin symbols.
- Any wild will get the multiplier which is on the reel where it lands.

- If both a multiplier increase and a wild lands on the same reel in the same spin, the multiplier increase will be applied before calculating wins.
- If a wild is part of a win on a winning pay line, we will multiply the win with the multiplier of that wild.
- If multiple wilds are part of a win on the same pay line, we will add the multipliers of the wild together before multiplying with the win.
- Free Spin symbols can only appear on reels 1, 3, and 5. Free spins are triggered when three free spins symbols land on the play area simultaneously during the base game.

Payouts

- Wins are paid based on combinations of identical symbols and wilds on a payline.
- Winning combinations start from the leftmost reel and the symbols must be consecutive along a payline.
- Only the highest win pays on each payline.
- Coinciding wins on different paylines are added together.
- Prizes in the payable are shown in respect to the current bet settings.

Multiplier

- There is one multiplier above each reel.
- Each multiplier will start the game round at 2x.
- When a multiplier increase symbol lands on a reel, its value is added to the multiplier value which is above that reel.
- The multiplier on each reel will stay at any increased value until a new game round starts. Specifically, it will not reset when we enter the bonus game or the free spins.

Bonus Game

- The bonus game is triggered when at least 5 coins are on the play area at the same time.
- The bonus game can trigger both from the base game and in the free spins.
- All coins which are on the play area when bonus game is triggered stay on the play area when you enter the bonus game.
- You start the bonus game with 3 spins left.
- Every time a new symbol lands on the play area, the number of bonus game spins left will return to 3.

- If all three positions on a single reel are filled with coin symbols, each coin pays out according to the multiplier of that reel and then get removed.
- All coins in the bonus game stay on the play area until the end of the bonus game, or until removed by filling up a reel.
- In the bonus game, the reels will contain empty positions without any symbols, coin symbols and multiplier increase symbols.
- In the bonus game, each position spins its own individual reel.
- When the bonus game ends, all remaining coins will pay bet back, without applying any multiplier.

Free Spins

- When free spins are triggered, we first enter the bottle spin game.
- In the bottle spin game, we choose how many free spins the player should get.
- The bottle will randomly spin and give the player 10, 12 or 15 free spin spins.
- In free spins, the coins will always flip if they can.
- You can trigger the bonus game from the free spins.
- If the bonus game is triggered in the free spins, you will return to the free spins and continue, after the bonus game is done.

Buy Feature

- You can buy your way into the free spins and bonus game from the main game. When you buy a feature, you have three different choices:
 - **Bonus Game.** When you buy the bonus game, you will do a base game spin where you are guaranteed to hit at least 5 coin symbols, which will trigger the bonus game. RTP for this option is XX.X%.
 - **10 Free spins or 15 Free spins.** When you buy one of these options, you go directly into the free spins with 10 or 15 free spin spins, respectively. The RTP of these options is XX.X% or YY.Y% respectively.
- You can configure the Total Bet price and see the Total Price for each choice available. The prizes in the feature are calculated based on the Total Bet amount.
