

GAME RULES

TUMBLING WINNINGS

- During the base game, cascading reels are active so that all winning symbols are removed from the reels after each win payout to create spaces for new symbols to land.
- This can lead to more combos and more payouts. Maximum number of consecutive cascades in a single round is limited to 50.

INCREASING GLOBAL MULTIPLIER

- During the game, each winning cascade increases the Global Multiplier by x1.
- At the end of each cascade, all the line wins are multiplied by the current value of the global multiplier.
- The multiplier value resets for each game round. Global multiplier can reach a maximum of x15 in a single round.

WILD WOLVES FEATURE

- During the game, Wild Moon symbol can land anytime on the reels. After landing, it may activate one of the 4 Wolves randomly on top of the screen. Activated Wolves will act as Wilds after landing on the screen until the end of that round. More than one wolf can be activated for a single game round.
- During a game round, if all Wolves are activated, any upcoming Wild Moon symbols that land will act as regular Wilds, as there are no other Wolves to be activated.
- Malfunction voids all plays and pays.
