MISCELLANEOUS:

The theoretical minimum payback percentage (RTP) is 93.80%.

The base game average RTP was determined by Monte Carlo simulation of 500 million regular bet spins by taking the total amount won and dividing it by the the total amount bet.

The expected payback reflects the theoretical return across a very large number of spins by numerous players over an extended period of time and cannot be affected by the player's strategy.

The game maximum possible win amount is 1000x bet.
