

Bonus Symbols

Wild:

The Dragon Head represents the Wild symbol, which can take the role of any other symbol, except for the Bonus and Dragon Bounty symbols

Bonus Symbol:

The Bonus symbol only lands on the first and third reels

Dragon Bounty Symbols

The Dragon Bounty symbol in combination with any Bonus symbol triggers the Dragon Bounty feature.

Dragon Bounty Feature

The Dragon Bounty feature starts when there is at least one Bonus symbol on each reel. Only Bonus and Dragon Bounty symbols land on the reels during the Dragon Bounty feature.

Dragon Bounty symbols only land on reel two and stick to the reels during the Dragon Bounty feature. Awards are indicated on the symbol in currency: x1, x2, x3, x5, x7, x10, and x15.

The initial number of respins for the Dragon Bounty feature is 3. Each new symbol that lands at the end of a Dragon Bounty spin resets the spin counter back to 3. The Dragon Bounty feature is in effect while there are respins left.

After the Dragon Bounty feature ends, the values in all Dragon Bounty symbols are included in the Total Win.

MOUNTAIN OF COINS FEATURE

Any Bonus symbol landing on the reels during the Base Game grants a chance of triggering the Mountain of Coins feature, which adds Bonus and Dragon Bounty symbols to activate the Dragon Bounty feature.

In-Game Jackpots

During the Base Game or the Dragon Bounty feature, any Jackpot symbols that land trigger the corresponding jackpot: Mini, Minor, Major, or Grand.

The Dragon Bounty feature collects the values of all Bonus symbols, including Mini, Minor, Major, and Grand Jackpot symbol values, and adds them to the winnings for the spin in the Base Game or Total Win in the Dragon Bounty.
