About the Game

even and Gems is a 5-column variable (3-4-5-5-4-3) row, 3600 WAYS slot game that includes the Seven Coin, Diamond, Free Spins, Hold & Win, and four fixed Jackpot features.

The theoretical average Return To Player (RTP) for this game is 96.18%.

Winning combinations, win amounts, and prizes are awarded according to the PAY TABLE:

- line wins are calculated from left to right
- calculations start from the leftmost reel
- only the highest win per line is paid
- the Bet Value is multiplied by the line pay
- wins on different pay lines are added

The PAY TABLE considers the current bet configuration and changes in accordance with the corresponding Bet Value. Prizes for winning combinations are awarded according to the PAY TABLE.

All bets and payouts are in the player currency. Payouts are based on the total Bet Value.

Wild

The Wild symbol can land on any reel during the Base Game. Depending on the result of a round, the Wild symbol can take the role of any other symbol in the game, except for the Scatter and Diamond symbols.

Wild in free spins

During Free Spins, the Wild symbol can land on reels 2, 3, 4, and 5 with a random multiplier of x1, x3, or x7. The multiplier applies to the win from the current WAYS.

Scatter

Three (3) Scatter symbols appearing anywhere triggers the Free Spins feature with ten (10) free spins. Each additional Scatter symbol on the reels adds two (2) more free spins:

- three (3) Scatter symbols award ten (10) free spins and 1x (times) Bet Value
- three (4) Scatter symbols award twelve (12) free spins and 2x (times) Bet Value
- three (5) Scatter symbols award fourteen (14) free spins and 3x (times) Bet Value
- three (6) Scatter symbols award sixteen (16) free spins and 4x (times) Bet Value

Seven Coin

Six (6) or more of either the Seven Coin or the Diamond symbols that land at the end of a given round trigger the Hold & Win feature and initially grant three (3) spins.

The Seven Coin symbols stick to the reels during the Hold & Win feature. Awards are indicated on the symbol in currency: x0.5, x1, x1.5, x2, x2.5, x3, x4, x5, and x10.

Hold & Win

Six (6) or more of either the Seven Coin or the Diamond symbols that land at the end of a given round grant three (3) rounds of the Hold & Win feature with a chance to win a Jackpot. After the initial spin wins have been paid, all symbols other than Seven Coin or Diamond symbols are shaded. All Seven Coin and Diamond symbols remain on the board and the player is granted three (3) Hold & Win spins. No symbol other than the Seven Coin and Diamond symbols can land during the feature.

If at least one (1) Seven Coin or Diamond symbol lands at the end of a spin, the spins counter resets back to three (3). The feature ends when all reels are filled with Seven Coin or Diamond symbols or when three (3) Hold & Win spins in a row don't land a new Seven Coin or Diamond symbol.

Diamond

The Diamond symbol can appear during the Base Game, Free Spins, and Hold & Win.

When the Diamond symbol is part of the set of symbols that trigger the Hold & Win feature, it remains in its position, collects all other values currently on the reels up to a maximum of twelve (12), including Mini, Minor and Major Jackpot symbols, and becomes a static coin with its value as the sum of all collected coins.

The Diamond symbol collects one (1) MEGA Jackpot if the player has three (3) MEGA Gem Jackpots on the screen and does not collect MEGA Jackpots if the player has less than three (3) MEGA Gem Jackpots on the screen.

Coins of Seven

Any Seven Coin or Diamond symbol landing on the reels during the Base Game grants a chance to trigger the Coins of Seven feature. This adds Seven Coin or Diamond symbols in quantity enough or more to activate the Hold & Win feature.

Jackpot Feature

The MEGA Jackpot can only be won or collected by a Diamond once during a Hold & Win feature. If the player has three (3) MEGA symbols already, no additional MEGA symbols land. If a Diamond has collected the MEGA Jackpot once, any following Diamond symbols do not collect it again.

The Major, Minor, and Mini Jackpots can be won multiple times during the Hold & Win feature.

Jackpot multipliers:

- MEGA Jackpot (2000x)
- Major Jackpot (150x)
- Minor Jackpot (25x)
- Mini Jackpot (15x)

Seven and Gems is a 5-column variable (3-4-5-5-4-3) row, 3600 WAYS slot game that includes the Seven Coin, Diamond, Free Spins, Hold & Win and four fixed Jackpot features.

Free spins

The Free Spins feature gets triggered when three (3) Scatter symbols appear anywhere on the reels. Once active, the Free Spins feature grants ten (10) free spins.

The Free Spins feature can be retriggered by landing at least three (3) Scatter symbols during a Free Spins feature round. This grants ten (10) more free spins, with each Scatter symbol on top of the three (3) required increasing the free spins count with an additional two (2) free spins. Thus, landing the maximum six (6) Scatter symbols yields sixteen (16) free spins.

Buy bonus Hold & Win

Purchasing a Seven Coins feature costs 45x (times) the corresponding Bet Value and initiates a round with a guaranteed Hold & Win feature activation.

The Seven Coins feature can only be purchased in the Base Game. The theoretical average RTP (return to player) for a purchased Seven Coins feature is 94.73%. The payout is based on the corresponding Bet Value.

Buy bonus Free spins

Purchasing a Free Spins feature costs 40x (times) the corresponding Bet Value and initiates a round with a guaranteed Free Spins feature activation.

The Free Spins feature can only be purchased in the Base Game. The theoretical average RTP (return to player) for a purchased Free Spins feature is 96.06%. The payout is based on the corresponding Bet Value.

Double chance boost

Activating the Double Chance Boost mode increases the frequency of triggering the Free Spins or Gems Jackpot features by a factor of more than 2 (around 2.18). Activating the Double Chance Boost mode increases the Total Bet by around 0.25 x Bet Value. The theoretical RTP (return to player) for the Double Chance Boost mode is 96.06%.
