

FEATURES

One or more SPECIAL blue coins trigger the Jackpot wheel.

Three scatter symbols adds five free spins even in an existing free spin game!

HOLD & RESPIN FEATURE

You'll need to land a gold coin on each of the three reels, although they don't have to appear on a payline.

This expands the reels to a 5x3 grid on which your gold coins are fixed in place.

The Hold & Respin starts with 3 gold coin symbols already on the screen.

Throughout the Hold & Respin, all gold coin symbols remain in their positions until the Hold & Respin feature ends

No other symbols than gold coins can appear during the Hold & Respin.

No other symbol than gold coins can take part in the final win at the end of Hold & Respin.

The initial number of respins is 3, and any new gold coin symbol as the result of any respin resets back the respin counter to 3.

The feature ends when the number of gold coin symbols becomes 15 or in the case of 3 Hold & Respins in a row without a gold coin symbol.

JACKPOT WHEEL

During the Hold & Respin feature, you can land a SPECIAL blue coin, which will award you a spin of the Jackpot Wheel.

You could win either the Mini, the Maxi, or the Mega Jackpot prizes if you are lucky.
