the total count of the same symbol after an Avalanche determines

the value of the win

- only the highest win combinations per symbol kind are paid - all win combinations are added together

- wins on different pay lines are added

The PAY TABLE considers the current bet configuration and changes in accordance with the corresponding Bet Value. Prizes for winning combinations are awarded according to the PAY TABLE.

All bets and payouts are in the player currency. Payouts are based on the total Bet Value.

SPECIAL SYMBOLS

The Bonus symbol can land on all reels in the Base Game and the Free Spins feature. The Bonus symbol is a Scatter symbol.

The Coin symbol can appear on all reels in the Base Game and Free Spins. The Coin symbol can appear with either values or multipliers. The Coin symbol is a Scatter symbol.

AVALANCHE

Any win activates the Avalanche. Bonus and Coin symbols do not activate the Avalanche.

During the Avalanche, all symbols in winning combinations pay out and disappear. For each winning combination, one of the disappearing symbols leaves behind a Coin symbol. After the Coin symbols are placed, new symbols fall, creating additional win opportunities. The Avalanche continues until a winning combination doesn't land.

MULTI COINS FEATURE

If there are five (5) or more Coin symbols on the reels after an Avalanche sequence ends, the Multi Coins feature is triggered. During the Multi Coins feature, the values over all value Coin symbols are summed to get the Total Win. If there are any multiplier Coin symbols, their values are also summed and the Total Win is multiplied by that product.

GOLDEN CHEST FEATURE

After any Base Game spin without a Multi Coins feature, any Coin symbol that lands has a chance to activate the Golden Chest feature. During the Golden Chest feature, between four (4) and eight (8) Coin symbols randomly replace existing symbols. After the Coin symbols are placed, the Multi Coins Feature is guaranteed to activate.

FREE SPINS FEATURE

The Free Spins feature gets triggered when four (4) Bonus symbols appear anywhere on the reels in the Base Game. Once active, the Free Spins feature grants fifteen (15) free spins.us

Additional free spins can be won by landing at least three (3) Bonus symbols during a Free Spins feature round:

- three (3) Bonus symbols grant five (5) more free spins
- four (4) Bonus symbols grant fifteen (15) more free spins

Free spins are played with the same Bet configuration as the round that activated the Free Spins feature. The Golden Chest feature cannot activate during Free Spins. The Multi Coins Feature is more common during Free Spins.

SCATTER BOOST MODE

Activating the Scatter Boost Mode feature increases the frequency of triggering the Free Spins feature by a factor of more than 2 (around 2.18). Activating the Scatter Boost Mode feature increases the Total Bet Value by 0.25x the corresponding Bet Value. The theoretical RTP (return to player) for the Scatter Boost Mode feature is 96.13%.

BUY FREE SPINS

Purchasing a Free Spins feature costs 80x (times) the corresponding Bet Value and initiates a round with a guaranteed Free Spins feature activation.

The Free Spins feature can only be purchased in the Base Game. The theoretical average RTP (return to player) for a purchased Free Spins feature is 96.25%. The payout is based on the corresponding Bet Value. The option to buy a Free Spins feature is disabled when the Scatter Boost Mode is on.
