

Nosferatu Bite Night

RULES

Bonus spins can be won during the base game.

5 bonus spins at 3 scatters

CRAZY BAT WILDS:

From time to time, Nosferatu turns into a bat and transforms up to three random symbols into a wild symbol.

FLACON OF BLOOD:

The level of the blood vial is linked to the bet amount and is saved independently of the bet amount. Individual scatters (blood symbols) fill the blood vial with one drop of blood each. Three scatters (blood symbols) fill the blood vial to 60 drops of blood, regardless of the current level. If the blood vial is filled with at least 60 drops of blood, the bonus game is activated.

When a player enters the game for the first time, they can perform a pre-spin without placing a bet, which fills the blood vial with a random number of blood drops between 5 and 15. No cash winnings are possible in this free spin.

HOLD AND WIN BONUS GAME:

The bonus game always starts with 5 bonus spins and is played on 15 reels. If a win is achieved only gold coins with the value printed on them count as wins; they are sticky. If at least one gold coin is added during a spin, all existing winning symbols are paid out again. If the player has fewer than 3 bonus spins remaining, the number of bonus spins increases to 3 with each win. After the bonus game, the blood vial is reset to 0.

The Gold Coin can have the following multipliers: 0.5, 1, 2, 3, 4, 5, 8, 10, 25, 50, 100, or 200 x bet.

BONUS BUY:

Buy the bonus for 100x Bet to get a full glass of Blood that starts the Bonus round.

MISCELLANEOUS:

The theoretical minimum payback percentage (RTP) is 94.04%.

The Buy Feature RTP is 94.08%.

The base game average RTP was determined by Monte Carlo simulation of 500 million regular bet spins by taking the total amount won and dividing it by the total amount bet.

The expected payback reflects the theoretical return across a very large number of spins by numerous players over an extended period of time and cannot be affected by the player's strategy.

Disclaimer: If an interrupted game is not finished within 90 days, your game will be terminated. If your game gets terminated you will lose every active bet. Only the highest winning combination per active win line pays. Malfunction of the virtual machine voids all plays and payment during the period of malfunction.

All wins occur on selected payline.

Bonus Games are played at the bet and lines of game which triggered the game.

Wins on different paylines are added.

Payouts are multiplied by current active bet.
